VII. Other Features

Non-forfeiture Option

If the policy has available cash value, the policyholder may elect at anytime any of the Non-Forfeiture Options below:

Option 1: Net Surrender Value - The policy may be surrendered for its Net Surrender Value which is the cash value plus any accumulated non-guaranteed dividends, less any indebtedness. The policy will terminate upon surrender. Cash values of TPD Plus, ADD, and PA riders are also paid to the policyholder. The policy will terminate upon surrender.

Option 2: Reduced Paid-Up Insurance - Policy may be continued without further premiums as a nonparticipating Reduced Paid-Up Insurance with a reduced Sum Assured equal to the Sum Assured amount that the cash value less any indebtedness would have purchased at the attained age of the Life Insured at the time of application of this option, but not to exceed the original Sum Assured. If the RPU coverage is greater than the original Sum Assured, any excess cash values will be refunded to the Policy Owner upon conversion to RPU. You shall be refunded any remaining dividend accumulation at the time of the application of this option.

Option 3: Extended Term Insurance - Policy may be continued without further premiums as a non-participating, Extended Term Insurance with a level Sum Assured equal to the Sum Assured for the then policy year less any indebtedness under this Policy. The duration of Extended Term Insurance corresponds to the period, of insurance coverage that would have been purchased by the cash value, derived from the Table on Non-forfeiture Values less any indebtedness at, the attained age of the Life Insured, at the time of the application of this, option. If the cash value less any indebtedness, is more than enough to continue the Extended Term Insurance until Policy Maturity Date, the excess will be used to provide the corresponding amount of Paid-Up Pure Endowment payable to you at Policy Maturity Date if the Life Insured is then alive. You shall be refunded any remaining dividend accumulation at the time of the application of this option.

Option 4: Automatic Premium Loan - Any premium due remaining unpaid at the end of the grace period is automatically paid as withdrawal from the remaining cash value which earns interest and is compounded every policy anniversary.

If there is no specific option elected, the automatic Non-Forfeiture Option will be the Extended Term Insurance.

Reinstatement

If the Policy terminates due to non-payment of premiums or due to overloan after the premium-paying period, the Policyowner (PO) may apply to reinstate it within five (5) years from the due date of the premium in default or from the date the policy lapsed due to overloan if:

The Policy has not been surrendered for cash or converted to an Extended Term Insurance which has expired; and
The Policyowner gives us satisfactory evidence of the health of Life Insured at the PO's own expense.

- If termination is due to non-payment of premiums, the Policyowner has to pay all the required premiums in arrears.
- If termination is due to overloan, you will be required to pay at least 20% of your loan balance.

Company reserves the right to charge interest on overdue premiums or Loans. The Expiry Date of the Premium Payment Term as shown in the Policy Data Page will not be changed.
